

SOLUTIONS FOR ASSISTING PARENTS

TRIPSPARK SCHOOL POOL is a ridematching program tailored specifically for assisting parents that transport their own children to school. Carpool references are quickly and easily generated via a simple web interface. Whether you manage the transportation for one school, a school district, or an entire region, School Pool offers cost effective secure tools to help you reduce traffic congestion and improve air quality.

TRIPSPARK SCHOOL POOL FEATURES

Accurate Matches with GIS Integration

- Matches families for carpooling
- Distance and time search criteria easily adjustable
- Match results in text and accompanying map, formatted as a PDF file

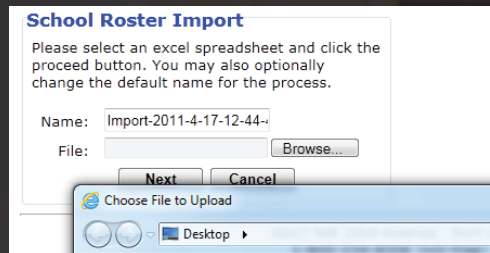

Simple Individual Registration

- Parents register their family and all students via an easy-to-use web page
- Each student can be registered to the appropriate school and schedule
- Geographic coordinates are derived from addresses simply and easily via Google web mapping services with no special knowledge. Even if an address is not recognized, it can be geocoded by clicking on the map
- Parents may run matches for their family and immediately see results

The screenshot displays the TripSpark School Pool web interface. At the top, there are navigation links: Schools | Letters | Codes | Users | Families | Processes | Change Password | Sign out | School | Logo | Contact | Password | Roster | Import | Match | Logins. Below this is the 'Search Options' section with input fields for 'Student Last Name' and 'Student First Name', an 'Ungeocoded' checkbox, and a 'Search' button. A 'Test School' location is listed as '212 W 10th St, Indianapolis, IN 46202' with a 'Delete Roster' link. The main content area shows 'Displaying 1 to 8 out of 8 total results' and a list of three search results, each with a green location pin icon and a list of student and parent names with 'Edit Delete Match' links. To the right of the text is a map of Indianapolis with several green location pins placed on the map, corresponding to the search results.

Batch Registration

- An entire school's registration can be imported from an Excel spreadsheet
- Batch Geocoding feature finds geographic coordinates from addresses behind the scenes while you do other work

Attractive, Configurable Results

- Match lists include only the data that each family wants others to see; confidential data is kept confidential
- Match results are accompanied with an introductory letter tailored for each school, including the school's logo as well as that of the local School Pool service
- An attractive full page color map is included in the output as well

Match Report Delivery

- Match reports are composed as PDF files, which may be emailed directly from School Pool to requesting families
- For those without Internet access, match lists can be printed and mailed

Individual and Batch Matching

- A match can be run for any requesting family – results are grouped by school, giving each family a single listing for all students at the same school
- Match reports can also be run in batch – processing all of the registrants for one school at a time

Secure Access at Multiple Levels

- Administrators have access to all data for all schools and families
- Parents may log in and gain access only to the data associated with their family

Walking School Bus / Bike Train Management

- Walking School Buses and Bike Trains may be created and matched to form leader oriented groups
- Accurate matching along the actual editable route is performed
- Promotes physical fitness for the school children and parents that participate
- Each group will have a primary leader and additional leaders as needed

TRIPSPARK SCHOOL POOL BENEFITS

- Reduce traffic congestion and pollution at the beginning and end of each school day
- Fast processing quickly matches families
- On-line registration for families reduces work load on school and rideshare service staff
- Match list delivery by email and web site reduces printing and postage costs
- Routes are displayed clearly and can be easily changed to improve safety

MOVING » « TOGETHER

TripSpark Technologies is a transportation technology company focused on helping schools and private operators increase the satisfaction of their transportation personnel and parents while also realizing cost savings and overcoming operational challenges. We are not just a vendor—we are your long-term strategic partner, offering the latest technologies while providing exceptional service and support.
