

# How K-12 Software

## Benefits Every Stakeholder

### ROUTER (AND ROUTING MANAGER)

Plan and create (safe) routes and account for each student's stop/route assignment as efficiently as possible. Build "what if" scenarios while retaining current term settings. Calendar-based scheduling is incredibly flexible and user-friendly.

### DISPATCHER

Locate buses in real time to verify schedule adherence and respond to enquiries for student information. Use planned versus analysis to share with routing to fine tune stop times, identify slack-time for better asset allocation. Handle daily substitutions to ensure 100% driver coverage.

### BUS DRIVER (AND THEIR SUPERVISORS/TRAINERS)

Easy-to-use system for bidding requests, work assignments and more from any location. In-vehicle technology allows for better route adherence and last minute route and roster modifications. Identify the appropriate re-training opportunities based on specific driving behaviors.

### STUDENT RIDER

Enjoys better on-time performance, and optimal ride times. This makes getting on and off the bus at the right stop worry-free.

### PARENT

Peace of mind knowing their children are on the safest routes, at safe stops and monitored from curb-to-curb. Many ways to access information about student location: GPS tracking, website, phone.

### ADMINISTRATION

Provide the safest, most efficient service to your district. KPIs used to benchmark districts performance versus other districts.

### DIRECTOR/ MANAGER OF OPERATIONS/TRANSPORTATION

Total insight and ability to report on: vehicle capacities, on-time performance, incidents, designated route adherence, field trip and special needs transport management and maintenance process.

### IT DIRECTOR

A single-source, integrated solution means that all hardware and software connect (securely) and are ready to scale up as needed with minimum database requirements.
