

TripSpark's Ridesharing Platform, RidePro

TripSpark's ridesharing software, RidePro, provides tools to meet your regional commuters' needs. RidePro is ideal for organizations that deliver ridematching, vanpooling, and multi-modal transportation solutions. It integrates with other popular products, including applications from our parent company, Trapeze Software Group.

1 COMPLETE PROGRAM MANAGEMENT

- Automate and streamline the matching process
- Interactive interface with Google Maps
- Extensive built-in reporting
- Improve staff productivity
- Ongoing product development
- Superior customer support programs
- Secure and resilient hosting environment

2 MULTI-MODAL MATCHING

- Configure searches based on:
 - Mode preference
 - Schedule flexibility
 - Geographical boundaries
 - Employer restrictions
 - Gender preference
- Contact match candidates:
 - Email
 - SMS
 - In-system message
- Show current and new vanpool routes
- Perform advanced cluster analysis
- Generate itineraries for direct routes and transfers
- Match to identified bike routes and potential bike partners

3 MULTI-MODAL LOGGING

- Design simplicity supports timely reporting
- Commuters record trips through intuitive interface
- Create repeated trip templates
- Commuters can:
 - View accumulated savings
 - Participate in challenges
 - Enter prize drawings
 - Earn additional incentives
- Employers and agencies can:
 - Track program data
 - Analyze program performance
 - Create stakeholder reports
 - Leverage metrics for grant opportunities

4 VANPOOL MANAGEMENT

- Complete control of the vanpooling experience
 - Rider matching and search
 - Wait list management
 - Ridership data collection
 - Vehicle maintenance tracking
 - Vanpool billing
 - Fare collection
- Industry-leading NTD report management
 - Submission-ready S-10 reports
 - Additional required reports
