Environmental Systems Research Institute (ESRI) Credentials

The gold standard and global market leader in GIS platform mapping solutions

Stable and dependable company with 50+ years of experience

Trusted track record of success with local, state, and federal government agencies around the world

EASIER ROUTE PLANNING, SCHEDULING AND SERVICE MONITORING

YOUR WISHLIST

- ✓ Keep map data up-to-the-minute (versus it going stale between manual map updates).
- ✓ You wanted to map even geographical details for more accurate routing and further reduce effort spent route planning.

WHY?

OUR SOLUTION

- ✓ Integrate world-class "Web-Based Maps" powered by ESRI in Streets 7

THE RESULTS

- ✓ Get real-time access to the most current map data for effective routing.
- ✓ Explore a variety of map styles, including Satellite View.
- ✓ Easily plan routes through broad areas like mall parking lots.
- ✓ See detailed maps with pinpoint stop locations, high-interest areas like schools, hospitals, and more.
- ✓ Leverage multiple data sources, including city and county GIS data for unmatched accuracy.
- ✓ Faster and easier route planning process overall so staff is free to focus on other priorities.

MAXIMUM CONVENIENCE FOR PASSENGERS

YOUR WISHLIST

- ✓ Make it easy to have high frequency routes adhere to a timetable.

WHY?

- ✓ You wanted to make sure trips stay in sync, prevent inconsistent headways and bus bunching, and maximize convenience for riders.

OUR SOLUTION

- ✓ **Frequency-Based Scheduling in Streets 7**

THE RESULTS

- ✓ Choose between timetable and frequency-based scheduling, as needed.
- ✓ Boost your ridership by providing the high frequency services and up-to-date information they've been asking for.
- ✓ Enable your drivers to manage spacing on the fly without dispatch oversight.
- ✓ Efficiently improve service levels on your high-frequency routes.

AUTO-MONITORING OF START TASKS

YOUR WISHLIST

- ✓ Eliminate any risk to data accuracy from drivers occasionally skipping or forgetting to start tasks—without adding more oversight work for dispatch.

WHY?

- ✓ Dispatch has enough to deal with already, and manual monitoring of start tasks is a hassle. You wanted a way to automate tracking tasks to ensure mileage, revenue/non-revenue hours, ridership data, funding, and performance reports are always accurate.

OUR SOLUTION

- ✓ "Work Not Started" alerts in Streets 7

THE RESULTS

- ✓ Send automatic alerts to dispatch if a driver skips/forgets to start tasks.
- ✓ Improve your reporting with comprehensive data collection.
- ✓ Ensure all service data is captured for every trip.
- ✓ Enhance your funding and grant applications with comprehensive and detailed metrics and data.

MINIMIZE IMPACT OF DRIVER SHORTAGE AND ABSENTEEISM

YOUR WISHLIST

- ✓ Find creative ways to reduce the impact of the ongoing driver shortage and last-minute unavailability of existing drivers on your team.

WHY?

- ✓ You're actively recruiting and building your workforce back up after the pandemic, but also need automated support for urgent reworking of trips and schedules in the meantime. Your staff is busy enough without needing to cancel or reschedule individual trips, or deal with the fallout of inaccurate data and "ghost buses" when trips don't get cancelled.

OUR SOLUTION

- ✓ "Single Trip Cancellation" option in Streets 7

THE RESULTS

- ✓ Streamline the trip cancellation process into just 2 steps – just right-click and cancel!
- ✓ Free your dispatchers to focus on other important tasks.
- ✓ Ensure riders have a great trip experience because they receive the quality, timely service they expect!

Excited to get everything on your wishlist and enjoy improved results?
