

REV UP YOUR RIDES WITH A SINGLE RIDER SOLUTION

Riders love using Rides on Demand because they have real-time trip information at their fingertips and a fast and easy way to plan and book a trip. The addition of fixed route schedules and trip planning takes the rider experience to a whole new exciting level.

Backed by first-class demand response software (TripSpark Novus or Trapeze PASS), riders can book microtransit and paratransit services, including co-mingled and eligibility-based trips, then view schedules and plan a trip on a fixed route. No need to switch apps!

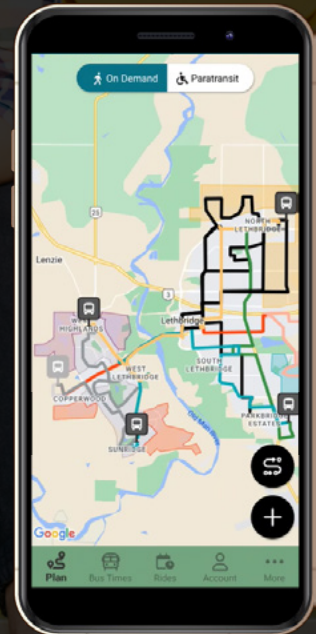

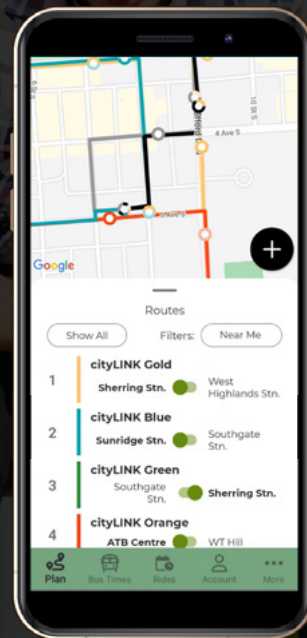

Since Rides on Demand works on an on-demand basis, agencies can easily increase their service area at a fraction of the cost of a typical fixed route service. This can help reach riders in more rural areas or in newly built communities.

📍 NEW! FIXED ROUTE SCHEDULES & TRIP PLANNING

Giving riders more control over how they plan their journey leads to higher levels of satisfaction. Riders now have the option of planning a fixed route trip in Rides On Demand, the same app they know and love. They can also view fixed route schedules, stop locations, and walking directions without switching apps.

📍 BOOSTING SCHEDULE ACCURACY WITH GTFS DATA

Riders rely on the accuracy of schedules for planning trips and nothing frustrates them more than missing a bus or running late because trip information is wrong. A steady stream of quality GTFS-RT data to Rides on Demand keeps schedules current and riders on track. And for current Streets agency partners, Rides on Demand takes data directly from your existing infrastructure.

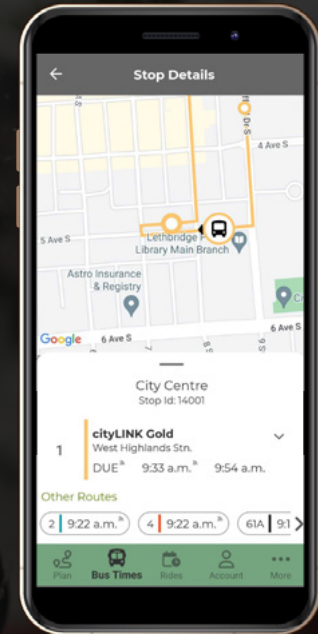

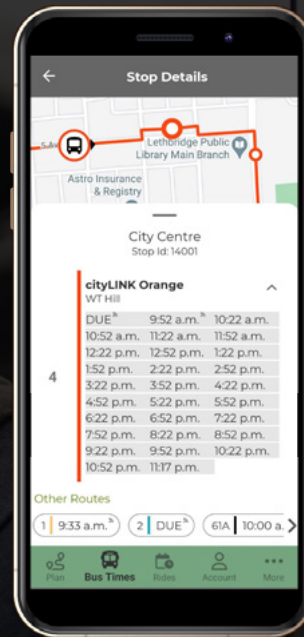

📍 RIDERS TRUST REAL-TIME TRIP INFORMATION

Studies show that riders with real-time vehicle locations reported wait times 30% lower than average. Easy to access real-time trip information, such as vehicle locations, gives riders confidence in your service reliability.

📍 LET RIDERS TAILOR THE TRIP

Rides on Demand is an easy to navigate mobile app that allows riders to customize preferences for a personalized trip experience. Riders can favorite stop locations and routes, see real-time schedules for both on-demand and fixed route services, track vehicles in real-time on a map, and only see the services they want to use for a trip.

➤➤ GROW YOUR RIDERSHIP WITH RIDES ON DEMAND

Managing multiple passenger information platforms is a headache your busy agency doesn't need. Rides on Demand is a single rider solution that's simple, user-friendly, and designed to meet WCAG 2.2 accessibility standards.

Rides on Demand makes it easy to get more people on board with a single app that guides riders through every step of their on-demand and fixed-route journeys.
